

ABSTRACT OF THE DISCLOSURE

5 The present invention provides a nitride semiconductor
laser by which stable high power room-temperature
continuous-wave oscillation in fundamental mode is possible.
A semiconductor laser diode comprising: a GaN layer; a first
conductive type nitride semiconductor layer formed on said
10 GaN layer and made of $\text{Al}_x\text{Ga}_{1-x}\text{N}$ ($0.04 \leq x \leq 0.08$); a first
conductive type clad layer formed on said first conductive
type nitride semiconductor layer and made of nitride
semiconductor; a core area formed on said first conductive
type clad layer and made of nitride semiconductor, said core
15 area including an active layer to emit light by electric
current injection; and a second conductive type clad layer
formed on said core area and made of nitride semiconductor.
